Smart Cities Summit concluded

Discussion sessions on the situation of smart cities, the possible ways to implement them in the Sultanate and their role in boosting the Omani economy and the digital community were held at the end of the Smart Cities Summit. Furthermore, there were discussions on the challenges facing the implementation of smart cities and the importance of assigning their implementation in the Sultanate.

Oracle Agreement

ITA had signed an agreement with Oman Society for Petroleum services (OPAL) to support a specialized training program for job seekers in Oracle software in coordination with the member corporations, as a step to Omanize the jobs related to Oracle database.

3 GCC countries at COMEX2017

Represented by 6 public organizations, Qatar, Kuwait, and Saudi Arabia take part in COMEX-Oman’s leading IT, Telecom and technology get-together in Muscat to showcase the latest trending technologies in the fields of finance, transportation, telecommunications, tourism, municipal affairs, justice, and IT.

3 Mobile Apps

The Ministry of Information launched three applications for smartphones through its website, which are “Maktabi” for the ministry’s employees, and “Ma’rifa” which contains a wide range of information about the Sultanate and “Huna Oman” for live broadcasting of local radio and TV channels, in addition to launching a number of internal and external electronic services.
